Dear Scott

Please will you Qsl my report 100% via the bureau. You are a new state for my "Worked all States" Award, which I hope to eventually claim on a heard basis. The club's signal is really fine and was pushing my S-meter to the +20db spot, and that is really good going as I only use a untuned long-wire antenna, which is very poor.

The Drake 4-Line, 1 kw. Home-Brew Linear and 5 element yagi at 85' does a wonderfull job, and it sounded as you were using some form of speech compression? By for now, Very Best 73's de Jonathan, A7325.
